

ATARI 8-Bit Error List

2	\$02	Out of memory / memory insufficient
3	\$03	Bad value
4	\$04	Too many variables
5	\$05	String length error / string length exceeded
6	\$06	Out of Data error / Data list exhausted
7	\$07	Number greater than 32767
8	\$08	INPUT statement error / INPUT type mismatch
9	\$09	Array or string dimension error
10	\$0A	Expression too complex / argument stack overflow
11	\$0B	Floating point overflow/underflow error / numeric overflow
12	\$0C	Line not found
13	\$0D	NEXT without FOR / no matching FOR statement
14	\$0E	Line too long
15	\$0F	GOSUB or FOR line deleted
16	\$10	RETURN without GOSUB
17	\$11	garbage error / undecipherable statement encountered
18	\$12	Invalid string character
19	\$13	Load program too long / program too large
20	\$14	Bad channel number
21	\$15	Not LOAD format / LOAD file error
22	\$16	?NEST Schachtelungsfehler (TurboBasic)
23	\$17	?WHILE missing for WEND (TurboBasic)
24	\$18	?REPEAT missing for UNTIL (TurboBasic)
25	\$19	?DO missing for LOOP (TurboBasic)
26	\$1A	?EXIT without loop (TurboBasic)
27	\$1B	XPROC (TurboBasic)
28	\$1C	?EXEC missing for ENDPROC (TurboBasic)
29	\$1D	?PROC unknown (TurboBasic)
30	\$1D	?# marker unknown (TurboBasic)
128	\$80	BREAK abort
129	\$81	Channel already open / IOBC already open
130	\$82	Unknown device / nonexistent device
131	\$83	Output only / IOCB write only
132	\$84	XIO syntax error / invalid command
133	\$85	Channel not open / device or file not open
134	\$86	Unknown channel number / bad IOCB number
135	\$87	Input only / IOCB read only
136	\$88	End of file
137	\$89	Record truncated
138	\$8A	Device does not respond / device timeout
139	\$8B	Device malfunctions or refuses command / device NAK
140	\$8C	Framing error on serial bus
141	\$8D	Cursor out of range
142	\$8E	Data frame overrun / serial bus data frame overrun
143	\$8F	Data frame checksum / serial bus data frame checksum
144	\$90	Disk error
145	\$91	Read-after-write compare error or bad screen mode handler
146	\$92	Function not implemented
147	\$93	Insufficient RAM for graphics mode
150	\$96	Serial port open
151	\$97	Concurrent mode I/O not enabled / concurrent mode error

ATARI 8-Bit Error List

152	\$98	Concurrent mode buffer error / illegal user supplied buffer
153	\$99	Concurrent mode active / active concurrent mode I/O error
154	\$9A	Concurrent mode inactive / concurrent I/O mode inactive
160	\$A0	Drive number unknown / drive number error
161	\$A1	Too many files open
162	\$A2	Disk full
163	\$A3	Unrecoverable system data I/O error
164	\$A4	File number mismatch
165	\$A5	Bad file name / file name error
166	\$A6	POINT data length error
167	\$A7	File locked
168	\$A8	Unknown XIO command / command invalid
169	\$A9	Directory full
170	\$AA	File not found
171	\$AB	POINT invalid
172	\$AC	Bad append
173	\$AD	Bad Sectors at Format
174	\$AE	Duplicate Filename
175	\$AF	Bad LOAD File
176	\$B0	Incompatible Format
177	\$B1	Disk damaged
180	\$B4	Bad LOAD File (XDOS 2.3)
181	\$B5	Address Range Error (XDOS 2.3)
182	\$B6	Bad number (XDOS 2.3)
